APX10™

Revolutionizing water data

data|APX®

From data to decision
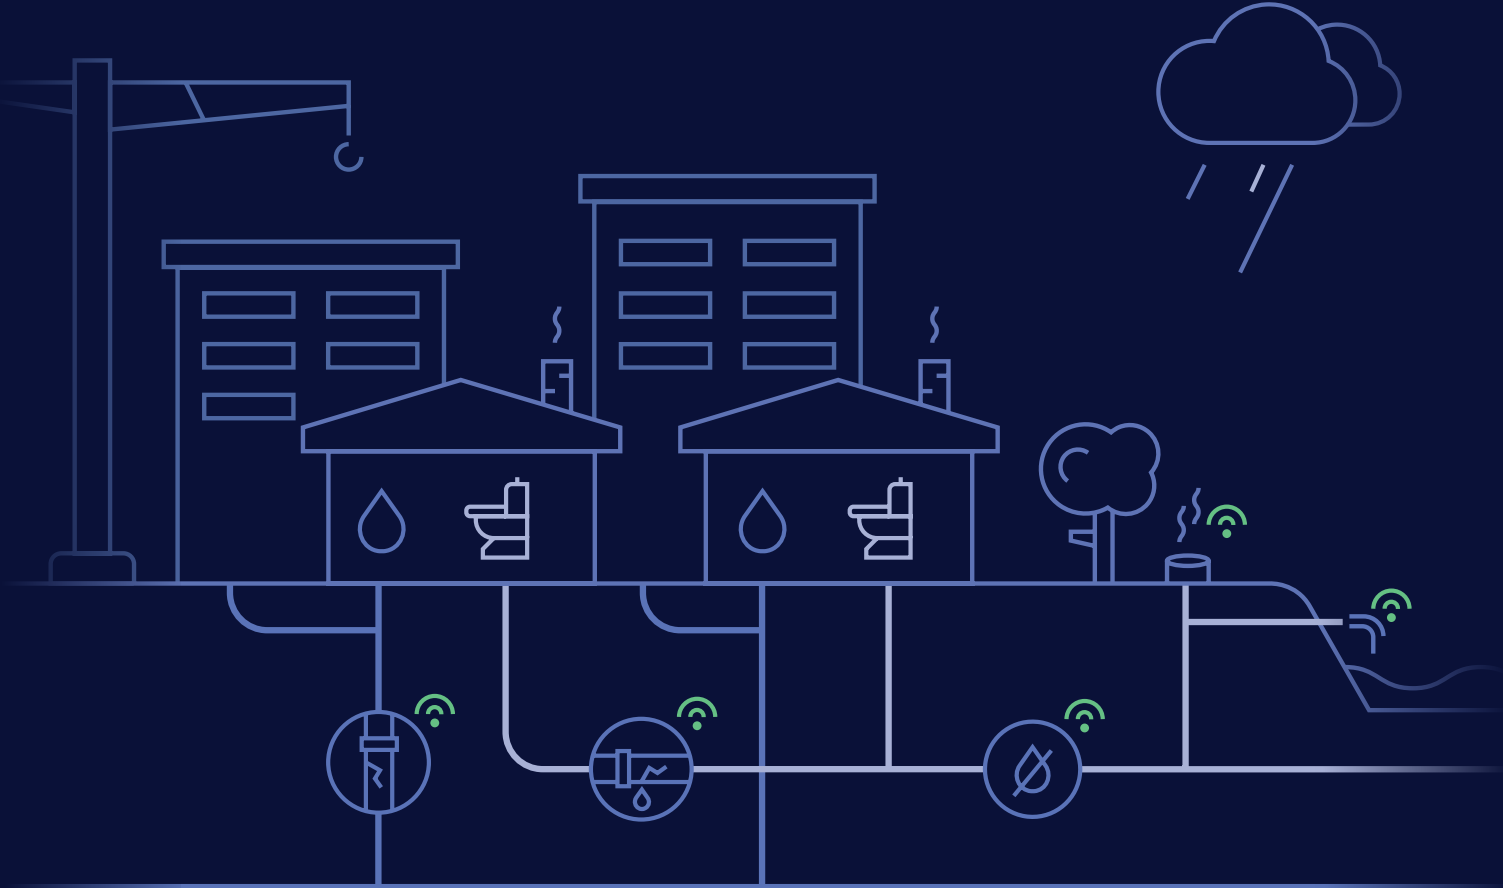

001011001110   001011001110

data|APX® features

- Cloud-based, subscription software solution built for automated deployment, security, and continues value creation for water utilities.

- Data-driven overview of network performance – including financial and criticality visualization.

- Single platform for all data management overview – from any IoT device, SCADA system, smart meter, GIS or public data source.

- Intuitive user-interface (UI) designed for ease-of-control, analysis, planning, and export.

Digital Advantages

Proactive, dynamic, and actionable intelligence for **precision reinvestment priorities.**

Straightforward Asset Performance Management for water utilities - **eliminating data silos.**

Enhanced data insights to **reduce excessive expenditures** on CCTV inspection and other CAPEX/OPEX costs.

Digitized manual processes to elevate operational efficiency and attract next-generation talent.

Data

Capture   **Analyze**   **Decide**
